About the Back-Pack 2 School Project

Since 2007, the Camanche Lake and Upcountry Community Centers have coordinated the Back-Pack 2 School Project. This is a county-wide project which provides backpacks filled with grade appropriate school supplies for local children so that they will feel supported by their community to be successful in school. The project's long-term goal is to have our students do well in school, graduate, and go on to higher learning. Backpacks and school supplies are provided through the generosity of individuals, businesses and community organizations. If you have any questions, contact:
